

CDC Awards ICF \$31 Million Health Surveillance Contract Company Will Help Monitor Infectious Diseases, Including COVID-19, and Other Health Impacts

FAIRFAX, Va., Oct. 5, 2021 /[PRNewswire](#)/ -- The U.S. Centers for Disease Control and Prevention (CDC) recently awarded global consulting and digital services provider ICF (NASDAQ:ICFI) a \$31 million recompile contract to provide development, operations and maintenance support to the agency's nationwide syndromic surveillance platform, BioSense. The contract has a term of four years, including a one-year base and three one-year options.

[BioSense](#) increases the ability of local, state and national health officials to monitor and respond to the harmful health effects of exposure to disease, addiction and hazardous conditions. It has been at the forefront of the nationwide response to COVID-19, continuously monitoring outbreak patterns and trends and alerting health officials of "hot spots" as they emerge.

ICF will work with CDC's Division of Health Informatics and Surveillance and its partners to improve syndromic surveillance efficacy and coverage, national platform sustainability, partner and community outreach and analytic capabilities.

"ICF [has supported BioSense](#) since 2014, playing an integral role in the nation's most critical public health threat responses, including the Zika and Ebola outbreaks, the opioid epidemic and analyzing the health impacts of heat waves and other natural events," said Mark Lee, ICF executive vice president and public sector lead. "We have built strong, trusted partnerships with the syndromic surveillance community and public health partners and bring the technical, analytical and public health expertise needed to continue to modernize and optimize this crucial national resource."

ICF brings together a broad set of public health, health technology and technical support services to help organizations solve their most complex challenges. ICF's innovative approach combines the best of advanced analytics, industry expertise and enterprise technologies to build agile solutions that meet clients' changing needs.
