

DHS Selects ICF for New \$36 Million Digital Modernization Task Order

Delivering Low-code Solution to Help Advance Women in Law Enforcement

RESTON, Va., Nov. 13, 2023 /PRNewswire/ -- The U.S. Department of Homeland Security (DHS) Office of Human Capital (OHC) recently awarded a new \$36 million task order to global consulting and technology services provider ICF (NASDAQ:ICFI) to modernize the Immigration and Customs Enforcement's (ICE) human resources technology systems.

The task order was awarded in the third quarter of 2023 under the [Scalable Ways to Implement Flexible Tasks \(SWIFT\) indefinite-delivery, indefinite-quantity contract](#) (IDIQ), which was awarded to ICF in fall 2022. It has a term of five years, including a one-year base and four one-year option periods.

ICF will build the enterprise-wide solution using [ServiceNow's](#) low-code HR Service Delivery module, bringing more transparency and accountability to the hiring and career advancement process. The company will also leverage its extensive expertise in human capital and workforce services to ensure the system advances the recruitment, retention and career progression of ICE employees.

This task order supports the administration's Women in Law Enforcement (WLE) initiative under Executive Order 14035, which seeks to strengthen the federal workforce through its ability to recruit, hire, develop, promote and retain talent. The WLE initiative also strives to remove barriers to equal opportunity and prioritize diversity, equity, inclusion and accessibility (DEIA). In addition to workforce and technology capabilities, ICF will also bring its DEIA organizational expertise to support this initiative.

"ICF has a solid track record of bringing service delivery excellence and rapidly deploying agile solutions that support reliable, enterprise-wide technology implementations to help achieve better mission outcomes," said Mark Lee, ICF chief technology executive. "We are excited to bring together our industry-leading workforce, technology and DEIA expertise to deliver a solution that advances ICE's digital modernization efforts and empowers its workforce to better fulfill the agency's mission."

ICF was also recently awarded a new \$32 million ICF SWIFT task order to modernize ICE's homeland security investigations systems.

ICF combines deep domain expertise with leading-edge technologies, advanced analytics and human-centered practices to help federal agencies design technology solutions that reduce time-to-value. The company's over 2,000 technologists work hand-in-hand with thousands of industry experts and an expansive ecosystem of over 30 platform partners to rapidly deliver scalable technology solutions that accelerate mission readiness, improve mission outcomes and achieve a step change in productivity. ICF was named ServiceNow's 2022 U.S. Federal Partner of the Year and is one of the only companies to receive this distinction twice.
