

ICF Launches ICF Fathom, a New Suite of AI Solutions for Federal Agencies

Flexible, Scalable Solutions and Intelligent Agents Accelerate Outcomes, Improve Efficiency and Drive Mission Impact

RESTON, Va., Aug. 5, 2025 /PRNewswire/ -- ICF (NASDAQ:ICFI), a leading global solutions and technology provider, today announced the launch of [ICF Fathom](#)™, a new suite of tailored artificial intelligence (AI) solutions and services designed specifically for federal agencies. Built to accelerate results and improve efficiency, ICF Fathom meets agencies where they are in their AI journey, whether piloting new tools or scaling enterprise-wide transformation.

"Federal agencies are under increasing pressure to quickly modernize, improve service delivery and operate more efficiently," said John Wasson, ICF chair and CEO. "With ICF Fathom, we've developed a flexible and production-ready solution that integrates seamlessly into existing systems at scale while unlocking the full potential of AI to support mission outcomes."

As part of the full suite of AI services and solutions, ICF Fathom delivers a set of intelligent AI agents that can be seamlessly and securely embedded into existing workflows and infrastructures. The AI agents are designed to perform complex tasks; support informed decision-making; reduce waste, fraud and abuse; and boost productivity. These agents can be configured to support a wide range of functions—from software development to document processing to grants management and regulatory analysis.

ICF Fathom operates on an open, modular architecture so agencies have the freedom to adapt, scale and evolve at their own pace and on their own terms. ICF Fathom can be embedded into existing infrastructures and technical environments. Agencies could also deploy a hosted or hybrid model, ensuring maximum flexibility. Built to scale and designed for real-world implementation, not just experimentation, ICF Fathom delivers immediate ROI. Drawing on ICF's deep federal domain expertise and proven technical delivery, ICF Fathom has already been deployed in several key government agencies and is helping those agencies realize measurable improvements in productivity, efficiency and mission performance.

ICF is one of the leading providers of digital modernization capabilities driving transformational solutions across business and government. From cloud platforms and automation to machine learning and AI, the company provides the foundation to meet dynamic end-user requirements and stand up a modern enterprise. ICF combines the best of advanced analytics, industry expertise and enterprise technologies to build agile solutions that evolve to meet clients' changing needs.
