Los Angeles County Selects ICF for $70 Million in New Energy Efficiency Work Orders

Public Sector Programs Will Help Lower Energy Costs and Strengthen Grid Reliability Across Southern California

RESTON, Va., Sept. 28, 2026 /PRNewswire/ -- ICF (NASDAQ: ICFI), a leading global solutions and technology provider, was recently awarded two new, multiyear work orders under the County of Los Angeles Energy Support Services Master Agreement to serve as one of three implementers supporting the Southern California Regional Energy Network's (SoCalREN) public sector energy efficiency programs. The work orders, which were awarded in early August 2026, have a combined ceiling value of approximately $70 million, with funding subject to the county's decision to exercise renewal options.

These new work orders expand ICF's scope under the master agreement, which also includes delivery of the county's residential and agricultural portfolios.

ICF will provide end-to-end program implementation services across SoCalREN's expansive service territory, including engineering, data-driven customer and project targeting, marketing and engagement, financing, and construction management support. The work will assist public agencies in identifying, funding and implementing energy efficiency and distributed energy resource projects designed to lower energy costs, strengthen resilience and support grid reliability.

ICF will combine its deep energy program delivery expertise and strong local partner network with leading-edge technologies, including ICF Sightline®, one of the industry's most trusted utility customer program platforms for analytics and insights, to pinpoint where and when energy demand is highest, predict ways to reduce grid stress and deliver targeted strategies to communities with the greatest needs.

"Public agencies play a critical role in strengthening grid reliability," said Kyle Wiggins, ICF senior vice president for energy, environment and infrastructure. "For more than a decade, we have supported SoCalREN in expanding access to affordable energy solutions, launching four new public sector programs and nearly doubling the portfolio's annual energy savings. We look forward to building on that momentum to expand participation, accelerate high-impact projects and deliver measurable outcomes across the communities they serve."

ICF delivers hundreds of energy efficiency, electrification and demand management programs for leading North American utilities serving residential, commercial and small business customers. The company helps clients design and implement cost-effective programs to enable energy savings for customers and system benefits to utilities. ICF's energy, technology and marketing experts collaborate with clients to increase program participation and make lasting community impact through advanced customer insights and targeting, robust analytics and award-winning customer engagement.

About ICF
ICF is a leading global solutions and technology provider. At ICF, business analysts and policy specialists work together with digital strategists, data scientists and creatives. Caution Concerning Forward-looking Statements
Statements that are not historical facts and involve known and unknown risks and uncertainties are "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995, as amended. Such statements may concern our current expectations about our future results, plans, operations and prospects and involve certain risks, including those related to: the government contracting industry generally; our dependence on contracts with U.S. federal, state and local, and international government clients for the majority of our revenue; failure by Congress or other governmental bodies to approve budgets and appropriations in a timely fashion, reductions in government spending, and the impact of a lengthy federal government shutdown; the current Administration's policy changes, executive orders, and failure to spend Congressionally mandated appropriations, including the resulting effect on government audits and contract terminations; changes in federal government budgeting and spending priorities; our ability to estimate and control costs under our fixed-price contracts; the realization of our backlog; the dependence of our commercial work on sectors of the global economy that are highly cyclical; and our ability to acquire and successfully integrate businesses. These and other factors that could cause our actual results to differ materially from those indicated in our forward-looking statements are described in the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2025, and in our subsequent filings with the Securities and Exchange Commission. The forward-looking statements included herein are made only as of the date hereof, and we specifically disclaim any obligation to update these statements in the future.
